

Goal Setting #ONEWORD One Pager

Directions!

What

One pagers are a creative way for you to share your ideas with the world. You will combine your artistic and writing abilities to create a goal for yourself for distance learning. This should truly represent what you hope to achieve. What do you want to accomplish? What grade do you hope to receive? How will you achieve this? How can you ensure your success while you learn from home? Within this one page, you will elaborate on these goals! Follow the prompts on the bottom of this page to complete this very important task!

Why

Choosing one word to define yourself for distance learning is a challenging task. It takes a great deal of reflection. Really consider the focus you want for your learning. How do you want to improve yourself? What do you want to get better at? What word will inspire that change or growth? Then, throughout this time, you can come back to this word. You can help this word define or redefine you. It can help you create new goals throughout the unit, it can help you make important decisions in your life, and it can help you refocus if you fall away from these goals.

How

1. Identify your goal word. The one word that will define you during distance learning.

2. Find and list as many synonyms as you can in this border section.

3. In this section, explain, in both words and graphics (drawings), what you hope to accomplish in this time. How will this word help?

#goals

4. My why. Explain, with words and graphics (drawings/images), the reason you have chosen this to be your word. Why do you need this word for this unit? What is the story behind this word? How will this word change you for this unit?

6. Finally, color the mini-border with the color of your goal. What color will focus you this unit? What color comes to mind when you hear your #oneword?

5. Explain with words and graphics what you will do when you struggle with meeting this goal? How will you persevere? What will get you through?
